This document is aimed at informing potential applicants seeking funding under the POLNORIS Call for Proposals, funded under the Applied Research and Innovation Programme of the EEA Grants 2021-2028. It serves as the template of the online application form as well as the instruction on how to submit the proposal.

How to fill out the form

Detailed information about completing the online application form and submitting a proposal is presented in *italic characters*, pre-filled information in the system is shown as greyed out. Additional annotations on how to fill in the form will be presented in orange text box.
Fields are mandatory if not specified otherwise.

When using the online system, we recommend using the Google Chrome browser. Please fill in text boxes directly in the online proposal form. Character limits include 'spaces' and 'enters' (line breaks). Images inserted into text fields do not count towards the character limits. Text should be entered and formatted directly in the designated text fields in the online system.
We do not recommend pasting text from text editors, as it may result in technical issues within the system. If copying is necessary, please paste the content as plain text and carefully review it after pasting.

Please note: the data entered into the online system is not saved automatically. To save, click on the appropriate button. In addition, if the user is inactive, they are automatically logged out of the system.

The Proposal form should be completed chronologically – starting from Section 1. Some of the later sections will not be available without filling in earlier sections of the Proposal Form.

Submission of proposal

The Project Promoter can edit and validate the proposal until its submission, no later than the closing date of the Call – 17.12.2026, 15:00:00 (CET). Before closing the application form save your input. After 15 minutes of inactivity the user is automatically logged out. Please note that no data is saved until you click the SAVE button. Saving the data does not mean that the proposal is submitted yet.

Proposals shall be submitted electronically **in English** through the Programme Operator's online system, available under the following address: https://lsi.ncbr.gov.pl/. Proposals submitted in any other way will not be regarded as having been received by the Programme Operator. Only the Project Promoter is authorised to submit a proposal on behalf of the Project Consortium.

In order to submit the proposal, the Project Promoter shall click the red 'Submit proposal' button. Only proposals that have been completed fully and correctly may be submitted. Otherwise, the error message informing that the proposal is invalid will be displayed.

Please note that if the proposal is not submitted as described above it is not regarded as having been received by the Programme Operator.

After submitting the proposal successfully, an e-mail acknowledging the receipt of proposal is sent by the online system to the Project Promoter. The e-mail contains: proposal title, number with acronym, name of the programme and call identifier to which the proposal was addressed as well as the date and time of receipt.

Please note that after successful submission, the edition of the proposal is blocked. In case of the necessity of the resubmission of the proposal, a new application must be generated, completed and submitted. If more than one copy of the same proposal is submitted, only the most recent version is assessed.

Pomoc publiczna – Podmiot … / State Aid – entity …

Parts of an application form regarding State aid concern each project partner being enterprise.
Those parts should be completed by each enterprise applying for funding.

By selecting the proper field, the enterprise should indicate the types of aid it applies for:
state aid for industrial research;
state aid for experimental development.

If an enterprise intends to apply for an increase in the State aid intensity for industrial research or experimental development, at least one respective field shall be selected. Increase by 15 percentage points and increase by 5 percentage points must not be combined with each other.

Detailed information about the aid is available in:
- Guide for Applicants and Evaluators for POLNORIS Call;
- Regulation on granting state aid through the National Centre for Research and Development (Journal of Laws item 1456, 2020);
- Commission Regulation (EU) No 651/2014 of 17 June 2014 declaring certain categories of aid compatible with the internal market in application of Articles 107 and 108 of the Treaty (OJ L 187 26.6.2014, p. 1)

III. CELE I UZASADNIENIE / OBJECTIVES AND JUSTIFICATION

1. Relevance

The project proposal shall address at least one of the key priorities of the EEA Grants as explained in the Guide for Applicants and Evaluators. The key priorities should not be understood as disciplinary limitations. Select one of the key EEA Grants priorities that the project primarily addresses.

1.1 Którego z kluczowych priorytetów Funduszy EOG projekt dotyczy przede wszystkim? / Which key priority of the EEA Grants does the project primarily address?	
Zielona transformacja Europy/ European green transition	☐
Demokracja, praworządność i prawa człowieka / Democracy, rule of law and human rights	☐
Włączenie społeczne i odporność / Social inclusion and resilience	☐

K1-Informacja Opublikowana (Public)

1.2 Spójność z realizowanym priorytetem / Coherence with the addressed key thematic priority (300 - 1800 characters)
Describe how your project aligns with and contributes to the chosen priority of the EEA Grants. *Explain the specific relevance of the chosen priority to your project by identifying the societal, technological, environmental, or governance challenges addressed. Show how the project's research questions, methods, and expected results are shaped in response to these challenges in Poland, the Donor States, and more broadly in Europe.* *Please note that the priorities are understood as broad thematic orientations, not disciplinary constraints. Show how your project interprets the chosen priority in a way that is scientifically and contextually meaningful.* *For addressed priority, briefly explain how the proposed research or innovation is positioned in relation to the European and national needs reflected in that priority.* *Where relevant, point to cross-cutting aspects such as behavioural change, citizen engagement, co-creation, social innovation, or human-centred technology development, showing how these reinforce coherence with the selected priority areas.*

2. Excellence

2.1 Objectives and ambition (600 – 5400 characters)
Describe the objectives of the proposed work. Indicate whether the objectives are measurable, verifiable, and realistically achievable within the project duration. *Describe how the project advances beyond the state-of-the-art, highlighting its ambition, any groundbreaking research, novel concepts, methodologies, products, services, or organisational models. Where relevant, compare with existing market solutions and summarise any patent or publication searches performed to demonstrate novelty.*

2.2 Methodology (600 – 12600 characters)
Describe and explain the overall methodology, including the key concepts, models, and assumptions underpinning the proposed work, and show how these will support delivery of the project objectives. Indicate any methodological challenges identified and how they will be addressed. This section should be written as a narrative, while detailed tasks and work packages appear later in part IV. *Summarise any national or international R&I activities whose results will contribute to the project and explain how these links will be established.* *If the project includes **interdisciplinary approaches**, describe how it actively integrates expertise, perspectives and methods from different disciplines to address a common problem. Explain how this collaboration extends beyond the applicant's usual research environment and networks, and how complementary methods from distinct disciplines are combined to achieve the project objectives.* *Describe how the gender dimension is considered in the research and innovation content. If not relevant, provide a justification.* *Describe how open science practices will be incorporated into the methodology and adapted to the nature of the project—for example, early sharing of results, ensuring reproducibility, open access to publications and data, or stakeholder participation. If no open science practices are appropriate, provide a justification.* *Note that funded projects will be required to prepare a Data Management Plan (DMP) by month 6 and update it during the project, describing how research outputs—particularly data—will be made FAIR (Findable, Accessible, Interoperable, Reusable).*

3. Impact

The results of the project should make a contribution to the expected outcomes set out in the Programme agreement: Improved quality of research and research-based innovation in Poland and Enhanced collaboration between beneficiary and donor state entities involved in the programme.

3.1 Project Pathways towards impact (600 – 7200 characters)
Provide a narrative explaining how the project's results will generate impact beyond the project's duration and scope.

K1-Informacja Opublikowana (Public)

Describe the unique contribution of the project to the expected outcomes, and the long-term impacts.
Provide quantitative estimates where meaningful. Be specific about the effects of your project, not the general state of R&I in the field. Clearly identify the target groups, breaking them into relevant segments (e.g., specific user groups, sectors, communities, policymakers).
Identify external requirements or barriers that may influence whether the expected outcomes and impacts can be achieved (e.g., additional R&I developments, regulatory conditions, market readiness, user adoption, behavioural factors). Indicate how these factors may evolve over time and outline any mitigation measures, whether inside or outside the project, to address uncertainties or potential barriers.

3.2 Measures to maximise impact - Dissemination, exploitation and communication (600 – 7200 characters)

Describe the planned measures to maximise the impact of your project and describe the dissemination, exploitation and communication measures that are planned, and the target group(s) addressed (e.g. scientific community, end users, financial actors, public at large).

Communication measures should promote the project throughout the full lifespan of the project. The aim is to inform and reach out to society and show the activities performed, and the use and the benefits the project will have for citizens. Activities must be strategically planned, with clear objectives, start at the outset and continue through the lifetime of the project. The description of the communication activities needs to state the main messages as well as the tools and channels that will be used to reach out to each of the chosen target groups. Measures should promote the project throughout the full lifespan of the project.

All measures should be proportionate to the scale of the project, and should contain concrete actions to be implemented both during and after the end of the project, e.g. standardisation activities. Your plan should give due consideration to the possible follow-up of your project, once it is finished. In the justification, explain why each measure chosen is best suited to reach the target group addressed. Where relevant, and for innovation actions, in particular, describe the measures for a plausible path to commercialise the innovations.

Describe possible feedback to policy measures generated by the project that will contribute to designing, monitoring, reviewing and rectifying (if necessary) existing policy and programmatic measures or shaping and supporting the implementation of new policy initiatives and decisions.

Outline your strategy for the management of intellectual property, foreseen protection measures, such as patents, design rights, copyright, trade secrets, etc., and how these would be used to support exploitation.

3.3 Readiness Level	☐ *Societal*	☐ *Technology*

To assess appropriate Readiness level, please use the resources:

3.4 How will the project support valorisation of knowledge and uptake of research and innovation results by society? What activities aimed at enhancing the valorisation of research are planned within the project? (Please note – these activities can be included in the project budget, provided they are eligible. Please consult the Cost Eligibility Guide)
Select all Knowledge Valorisation channels that apply to your project and provide short explanation. (min. 600; max 1800 characters)

☐ Industry-academia collaboration and mobility
☐ Creation of research-driven spin-offs and start-ups
☐ Intermediaries and knowledge transfer professionals support

K1-Informacja Opublikowana (Public)

☐ Engagement of citizens, public bodies and societal actors ☐ Intellectual assets management ☐ Standardisation ☐ Policy uptake ☐ Other
In line with Guide for Applicants and Evaluators, projects funded under the POLNORIS Call shall include activities aimed at enhancing the valorisation of research. Select all channels that apply to the project and briefly describe relevant planned activities. *The Programme recognises that Knowledge Valorisation is a novel concept and all Applicants are encouraged to explore the subject and available materials, e.g.:* https://research-and-innovation.ec.europa.eu/research-area/industrial-research-and-innovation/eu-valorisation-policy/knowledge-valorisation-platform_en https://research-and-innovation.ec.europa.eu/news/all-research-and-innovation-news/new-framework-measure-knowledge-valorisation-2026-03-30_en https://op.europa.eu/en/publication-detail/-/publication/dfb4ba59-2928-11f1-a7dd-01aa75ed71a1/language-en *https://impact.nwo.nl/impact-focus-van-kennis-naar-toepassing/toolbox*

4. Implementation

4.1 Work Plan and resources (600 – 5400 characters)
Provide brief presentation of the overall structure of the work plan. Please note that this should include narrative description – details on Work Packages should be added in part IV. *Resources assigned should be in line with objectives and deliverables.* *Describe any critical risks, relating to project implementation by listing involved WP(s), that the stated project's objectives may not be achieved. Detail any risk mitigation measures. Please note: If serious risks exist (i.e. risks that could cause strong negative impacts and whose probability of occurrence is high), the project design should be reconsidered. In this point you should go beyond the description of how you want to tackle risks emerging in the project, e.g. regular consortium meetings.*

4.2 Capacity of participants and consortium as a whole (600 – 7200 characters)
Describe how the consortium is structured to meet the project's objectives, demonstrating that it brings together the necessary disciplinary and inter-disciplinary expertise, including—where relevant—competences in social sciences and humanities, open science practices, and gender aspects of R&I. *Explain how all partners will have access to the critical infrastructure required to perform the planned activities. Show how the consortium members complement each other, and how their combined expertise covers the relevant parts of the value chain, where applicable. Clearly indicate each partner's specific contribution, demonstrating that all partners have a valid role and sufficient resources to fulfil it.* *If the project includes **cross-sectoral approaches**, describe how it actively engages entities from different sectors (such as academia, industry, public authorities, non-governmental organisations, civil society or other relevant stakeholders) to address a common problem. Explain how collaboration extends beyond the academic environment and the roles and contributions of non-academic partners.* *If relevant, describe the industrial or commercial involvement in the project, explaining how this supports the planned exploitation of results and contributes to achieving the project's impact goals.* *Provide short description of how the project will be managed on a daily basis, how you will make sure that the tasks proposed are executed and results delivered. Provide description of how you will make sure that the work of a consortium runs smoothly and project participants constitute one team with clear vision and ambitions. If new staff needs to be hired for the project, please explain how you will make sure that these people are in place at the start of the tasks foreseen to be undertaken by them.* *Describe how communication (channels, methods etc.) between all partners will be organised and how decisions will be taken.*

4.3 Explain the role of research manager in the project and how her/his expertise will support, among others, effective coordination, communication, and achievement of project objectives. If you consider that dedicated research manager support is unnecessary in the context of the proposed work, please provide a justification. (min. 300; max. 1800)

K1-Informacja Opublikowana (Public)

Project is encouraged to consider the active engagement of research manager. Describe both the way the research manager will support the project and how the project will support the capacity building in research management of the Project Promoter and if applicable other partners. Such costs should be included in Staff Costs category of the budget with relevant description. If dedicated research management support is not considered necessary for the proposed project, please provide a brief justification for this approach.

5. Bilateral Dimension

5.1 Quality of bilateral cooperation (600 – 5400 characters)
Describe the benefits of the bilateral partnership and explain how cooperation with the Donor project partner(s) contributes positively to achieving the project's objectives. *Show that the Donor partner(s) has a clear, active, and meaningful role, and specify the added value they bring to the project through their expertise, resources, or unique capabilities.* *Explain the division of tasks and resources, demonstrating that it is appropriate in relation to the Donor partner's planned activities and responsibilities.* *Describe the extent of cooperation through joint activities, highlighting where integrated work, shared methodologies, or co-developed outputs require contributions from the Donor partner(s).* *Show how the bilateral cooperation enhances project excellence by combining complementary expertise, strengthening scientific or innovation quality, and supporting integrated research or innovation work.*

6. Ethics Issues Table Checklist

1. HUMAN EMBRYONIC STEM CELLS AND HUMAN EMBRYOS			
Does this activity involve Human Embryonic Stem Cells (hESCs)?		Yes	No
If YES	*Will they be directly derived from embryos within this project?*	Yes	No
	Are they previously established cells lines?	Yes	No
	Are the cell lines registered in the European registry for human embryonic stem cell lines?	Yes	No
Does this activity involve the use of human embryos?		Yes	No
If YES	*Will the activity lead to their destruction?*	Yes	No
2. HUMANS			
Does this activity involve human participants?		Yes	No
If YES	*Are they volunteers for nonmedical studies (e.g. social or human sciences research)?*	Yes	No
	Are they healthy volunteers for medical studies?	Yes	No
	Are they patients for medical studies?	Yes	No
	Are they potentially vulnerable individuals or groups?	Yes	No
	Are they children/minors?	Yes	No
	Are they other persons unable to give informed consent?	Yes	No
Does this activity involve interventions (physical also including imaging technology, behavioural treatments, etc.) on the study participants?		Yes	No
If YES	*Does it involve invasive techniques?*	Yes	No
	Does it involve collection of biological samples?	Yes	No
Does this activity involve conducting a clinical study as defined by the Clinical Trial Regulation (EU 536/2014)? (using pharmaceuticals, biologicals, radiopharmaceuticals, or advanced therapy medicinal products)		Yes	No
If YES	*Is it a clinical trial?*	Yes	No
	Is it a low-intervention clinical trial?	Yes	No

3. HUMAN CELLS / TISSUES (not covered by section 1)				
Does this activity involve the use of human cells or tissues?			Yes	No
If YES	*Are they human embryonic or foetal cells or tissues?*		Yes	No
	Are they available commercially?		Yes	No
	Are they obtained within this project?		Yes	No
	Are they obtained from another project, laboratory or institution?		Yes	No
	Are they obtained from biobank?		Yes	No
4. PERSONAL DATA				
Does this activity involve processing of personal data?			Yes	No
If YES	*Does it involve the processing of special categories of personal data (e.g.: sexual lifestyle, ethnicity, genetic, biometric and health data, political opinion, religious or philosophical beliefs)?*		Yes	No
	If YES	*Does it involve processing of genetic, biometric or health data?*	Yes	No
	Does it involve profiling, systematic monitoring of individuals, or processing of large scale of special categories of data or intrusive methods of data processing (such as, surveillance, geolocation tracking etc.)?		Yes	No
Does this activity involve further processing of previously collected personal data (including use of preexisting data sets or sources, merging existing data sets)?			Yes	No
Is it planned to export personal data from the EU/EEA to non-EU/EEA countries?			Yes	No
If YES	*Specify the type of personal data and countries involved:*			
(FIELD TO BE COMPLETED min 2; max 300)				
Is it planned to import personal data from non-EU/EEA countries into the EU/EEA or from a non-EU/EEA country to another non-EU/EEA country?			Yes	No
If YES	*Specify the type of personal data and countries involved:*			
(FIELD TO BE COMPLETED min 2; max 300)				
Does this activity involve the processing of personal data related to criminal convictions or offences?			Yes	No
5. ANIMALS				
Does this activity involve animals?			Yes	No
If YES	*Are they vertebrates?*		Yes	No
	Are they non-human primates (NHP)?		Yes	No
	Are they genetically modified?		Yes	No
	Are they cloned farm animals?		Yes	No
	Are they endangered species?		Yes	No
6. NON-EU/EEA COUNTRIES				
Will some of the activities be carried out in non-EU/EEA countries?			Yes	No
If YES	*Specify the countries:….*			
In case non-EU/EEA countries are involved, do the activities undertaken in these countries raise potential ethics issues?			Yes	No
If YES	*Specify the countries:….*			
Is it planned to use local resources (e.g. animal and/or human tissue samples, genetic material, live animals, human remains, materials of historical value, endangered fauna or flora samples, etc.)?			Yes	No

K1-Informacja Opublikowana (Public)

Is it planned to import any material (other than data) from non-EU/EEA countries into the EU/EEA or from a non-EU/EEA country to another non-EU/EEA country? For data imports, see section 5.4	Yes	No
If YES	*Specify material and countries involved….. (min 2; max 300)*	
Is it planned to export any material (other than data) from the EU/EEA to non-EU/EEA countries? For data exports, see section 5.4	Yes	No
If YES	*Specify material and countries involved….. (min 2; max 300)*	
Does this activity involve low and/or lower-middle income countries? (if yes, detail the benefitsharing actions planned in the self-assessment)	Yes	No
Could the situation in the country put the individuals taking part in the activity at risk?	Yes	No
7. ENVIRONMENT, HEALTH and SAFETY		
Does this activity involve the use of substances or processes that may cause harm to the environment, to animals or plants (during the implementation of the activity or further to the use of the results, as a possible impact)?	Yes	No
Does this activity deal with endangered fauna and/or flora / protected areas?	Yes	No
Does this activity involve the use of substances or processes that may cause harm to humans, including those performing the activity (during the implementation of the activity or further to the use of the results, as a possible impact)?	Yes	No
8. DUAL USE		
Does your research involve dual-use items in the sense of Regulations 428/2009, or other items for which an authorisation is required?	Yes	No
9. MISUSE		
Does your research have the potential for misuse of research results?	Yes	No
10. OTHER ETHICS ISSUES		
Are there any other ethics issues that should be taken into consideration?	Yes	No
11. ARTIFICIAL INTELLIGENCE		
Does this activity involve the development, deployment and/or use of Artificial Intelligence based systems? (if yes, detail in the self-assessment whether that could raise ethical concerns related to human rights and values and detail how this will be addressed).	Yes	No

12. DNSH principle				
Is the project compliant with the "Do no significant harm principle" (DNSH) in accordance with the EU Taxonomy Regulations?	YES	PARTIALLY	NO	CANNOT BE ASSESSED
Provide comments in the case the answer to the question is 'Partially', 'No' or 'Cannot be assessed'.	*Comments…*			

IV. OPIS PRAC BADAWCZO-ROZWOJOWYCH / WORK PACKAGES DESCRIPTION

Before completing Work Package Description, please read the Guide for Applicants and Evaluators.

Guidance on how to classify research activities to research types in socio-economic projects, please consult the guidance at https://www.gov.pl/web/ncbr-en/a-guide-to-the-classification-of-tasks-in-socio-economic-rd-projects

In this section each work package (max. 10) should be described. Each work package (WP) should be added separately, to a relevant type of research. Please present work packages in detail. The explanations have to be sufficient for justifying the proposed effort and allow for progress monitoring.

Only industrial research and experimental development will be funded. Other type of activities (e.g. coordination, dissemination, management) cannot be separate WPs and may only be parts of research WPs. Therefore, from the

formal point of view it is not possible to have a WP dedicated to management and dissemination/communication activities only. Those activities shall be described and planned within research WPs.

At the same time, it is expected to include under research WPs activities related to knowledge valorisation. It is not possible to create separate WPs for the aforementioned activities. They should all be included in the research WPs.

Include only the researchers involved in the proposal3 (see below definition of 'researcher'). You do not need to include in the table the identity of other persons involved in the proposal who are not researchers.
Consideration should be given to:
- PI,
- WP leaders,
- Key researchers involved in the project.

'Researchers are professionals engaged in the conception or creation of new knowledge. They conduct research and improve or develop concepts, theories, models, techniques instrumentation, software or operational methods. (Frascati Manual 2015)'.

VI. CZĘŚĆ FINANSOWA / FINANCIAL PART

NOTE: Before completing Financial Part please read the '**Cost Eligibility Guide'** for the POLNORIS Call.

All costs must be given in the Polish zloty (PLN).

This section is divided into cost categories. Within each cost category there is a separate part for Project Promoter and project partner(s) to be filled in.
Costs for each entity must be inserted separately.
Follow the numbers of Entities (1, …, n) in accordance with a table in part I.1. of the application form.

1. Wynagrodzenia (W) / Staff costs (W)

Nazwa kosztu kwalifikowalnego / Name of eligible cost	*Please enter the position or role within the project (without giving any names).* *max. 200 characters*
Wysokość kosztu kwalifikowalnego / Amount of eligible cost	*Specify the cost in PLN*
Uzasadnienie / Justification	*Specify the range of duties of a particular person or team during project implementation, max. 700 characters*
Metoda oszacowania / Estimation method	*Present how the remuneration was estimated (e.g. generally available data on average remuneration that is analogous to the position in a particular region).* *Please state the number of employees (if there is more than one), the type of employment (e.g. contract work), and the number of person-months or information about used simplified cost option (SCO)* *max. 500* characters
Numer zadania / WP number	*Select from the list*

2. Podwykonawstwo (E) / Subcontracting (E)

The total costs of category E for all entities can be up to 70% of the total budget of the project.

Nazwa kosztu kwalifikowalnego / Name of eligible cost	*Enter the name of the cost, max. 200* characters
Wysokość kosztu kwalifikowalnego / Amount of eligible cost	*Specify the cost in PLN*
Uzasadnienie / Justification	*Justify the subcontracting. max. 700 characters*
Metoda oszacowania / Estimation method	*Present how estimations of each expense were obtained, incl. data sources (e.g. generally available price lists or bids collected by Applicants). max. 500 characters*
Numer zadania / WP number	*Select from the list*

3. Aparatura i WNiP (A) / Equipment and intangible assets (A)

Only the portion of the depreciation corresponding to the duration of the project and the rate of actual use for the purposes of the project may be considered eligible expenditure in this category. Norwegian universities and university colleges may also use the simplified cost options (SCO) in the form of unit costs to calculate costs attributable to the use of Research infrastructure resources (RIR).

Forma rozliczenia / Settlement form	
AMORTYZACJA / DEPRECIATION *RIR UNIT COSTS (only for Norwegian universities/university collages)*	
Nazwa aparatury naukowo badawczej i WNiP / Name of research equipment and intangible assets	*Enter the name of research equipment or intangible assets. ax. 200 characters*

K1-Informacja Opublikowana (Public)

Uzasadnienie / Justification	*Justify the need to use equipment/intangible assets. max. 700 characters.*
Wysokość kosztu kwalifikowalnego / Amount of eligible cost	*Specify the cost in PLN*
Metoda oszacowania / Estimation method	*Please present how estimation of this expense was obtained, incl. data sources (e.g. generally available price lists or bids collected by Applicants) or information about used simplified cost option (SCO). max. 500 characters.*
Sposób zagospodarowania / means of using	*Specify how the research equipment or intangible assets will be used, and how they will be disposed of once the project has been completed. max 300 characters.*
Numer zadania / WP number	*Select from the list*

4. Pozostałe koszty bezpośrednie (Op) / Other direct costs

Other direct costs (Op) are eligible only for research organisation and other entities (other than research organisations or enterprises)

Nazwa kosztu kwalifikowalnego / Name of eligible cost	*Enter the name of the cost, max. 200 characters*
Wysokość kosztu kwalifikowalnego / Amount of eligible cost	*Specify the cost in PLN*
Uzasadnienie / Justification	*Justify other direct expenditures, including travel and subsistence costs, consumables and supplies and other costs e.g. promotional activities and audits, max. 700 characters.*
Metoda oszacowania / Estimation method	*Present how estimations of each expense were obtained, incl. data sources (e.g. generally available price lists or bids collected by Applicants). max 500 characters*
Numer zadania / WP number	*Select from the list*

5. Koszty Ogólne/Pośrednie (O) / Overheads/Indirect costs (O)

Please note that overheads cannot constitute more than:
- 25% of all eligible costs for **Research organisation** and **OTHER** - **O = (W +A +Op) x 25%**
- 20% of all eligible costs for **enterprises** - **O = (W+E+A) x 20%**

In practice the online system will apply formulas for both types of entity and the amount will be calculated automatically as overheads/indirect costs (O).

In case of Norwegian research institutes which report personnel rates to the Research Council of Norway, and have those personnel rates calculated and approved by the RCN, and may use those as Standard scales of unit costs, this rate will show 0. The same rates as in applications to RCN calls apply. It is important to note that in such cases, no indirect or overhead costs should be included in the budget, as they are already included in the personnel rates.

Also in case of using by Norwegian universities and university colleges the simplified cost options in the form of unit costs to calculate costs of personnel or cost attributable to the use of Research infrastructure resources (RIR), no indirect or overhead costs should be included in the budget, as they are already included in the unit costs.

Stawka (%) ryczałtu kosztów ogólnych / Flat rate (%)	*generated automatically*

6. Dofinansowanie

Table to enter requested funding will appear for each Work Package for which information is filled in earlier part of the form. The system displays a suggestion of the maximum amount the entity may apply for. The amount is calculated based on the information provided in the form.

VII. WSKAŹNIKI / INDICATORS

Please provide a realistic target value for each relevant indicator. The proposed target values should be consistent with the information provided in other parts of the project proposal. Indicators are used to help measure implementation progress and illustrate the extent to which expected outputs and outcomes are achieved.

In general, indicator values are of a statistical nature and are not directly assessed during the evaluation of applications. However, progress towards these values may be reviewed during project implementation. If an indicator is not applicable to your project, please enter "0" as the target value.

Indicators refer to the project consortium as a whole. Definitions of the indicators are presented in the table below. The baseline value for all indicators is 0. Unless specified otherwise, the target value is expected to be achieved by the end of the project implementation period.

Lp. / No.	**Nazwa wskaźnika / Indicator**		**Jednostka miary / Unit of measurement**	**Wartość bazowa/ Baseline value**	**Wartość docelowa/ Target value**
1.	**Number of joint applications submitted** for further funding	EU / Horizon	Number	0	
		national funding	Number	0	
		international funding	Number	0	
	The total number of collaboratively submitted joint applications for further funding. The submission should be a continuation of existing collaboration supported by the EEA Grants, including at least 1 researcher from the supported Donor State project partner and 1 researcher from the Project Promoter / Polish project partner. Submission should take place before 30th April 2031.				

K1-Informacja Opublikowana (Public)

	To count towards this indicator, the application must: - Be formally submitted to a funding programme (e.g., national programmes, Horizon Europe, Interreg, ERC, or other international programmes). - Be documented with evidence of submission (title of the project, funding source/name of the programme, status of the application, project budget).			
2.	**Number of new products, technologies, services and solutions developed**	Number	0	
	The total count of newly developed or significantly improved products, technologies, services, or solutions. This indicator reflects the capacity for innovation and development within supported project, regardless of whether the outputs have been commercialized or fully implemented. It captures the tangible results of activities undertaken in the project. **Products**: Tangible goods introduced to the market or internal use (e.g. a new medical device, manufacturing equipment, or consumer good). **Technologies**: Novel or enhanced technical solutions, including software, hardware, or scientific tools (e.g. a novel algorithm, sensor, or manufacturing process). **Services**: New or upgraded offerings that provide value to users (e.g. a digital platform, consulting model, or public service). **Solutions**: Integrated approaches addressing specific challenges, often combining products, technologies, and services. To count towards this indicator, the development must be: - **Completed**: The product, technology, service, or solution is fully developed and operational (not in draft or concept stage). - **Documented**: There is clear evidence of development, such as prototypes, technical documentation, commercialisation records or internal validation. - **Directly resulting from the project activities supported by the grants**.			
3.	**Number of joint, peer-reviewed, scientific publications submitted**	Number	0	
	The total number of collaborative scientific publications submitted for peer review. Each publication must be a direct result of work conducted within a project supported by the POLNORIS Call, EEA Grants. Scientific publications include research articles, review papers, case studies, conference proceedings, or other scholarly works that present original research findings, literature reviews, or theoretical contributions. Publications must be submitted to journals, other publications, or conferences that require an independent peer-review process conducted by qualified experts in the relevant field. To count towards this indicator, the publication must meet the following criteria: - Be a direct output of a project funded under the POLNORIS Call, EEA Grants 2021–2028. - Be co-authored by authors from at least two institutions – one based in Poland and one in a Donor State – that participated in the implementation of the project supported by the POLNORIS Call, EEA Grants 2021–2028. A publication is considered "submitted" once it has been formally sent to a peer-reviewed outlet for review, regardless of acceptance status. If submitted to multiple publications, it is counted only once.			
4.	**Number of mentor-mentee relationships established for early-stage researchers**	Number	0	
	The total number of mentor-mentee relationships established for early-stage researchers. Early stage researcher is defined as a researcher who fits the criteria of as defined in Article 360 section 2 point 2 and Article 360 section 3 of the Act of 20 July 2018 on the Law of Higher Education and Science, (Journal of Laws item 1668, 2018). Mentor-mentee relationship should be established between the early stage researcher and a mentor and a clear plan of the planned mentor-mentee relationship (participants, clear description of goals and objectives of this relationship, as well as needs and availability, incl. means of communication, schedule of contact and meetings, topics/skills to be explored by a mentee in which a mentor has expertise or knowledge, etc.). Mentor-mentee relationship cannot be established between PhD student and their supervisor. A clear mentor—mentee plan must be established to provide details of the planned mentor-mentee relationship.
